Enhancing Creativity

📖 Free eBook! As part of the Process portion of TAPE, withTAPE.com is launching an eBook series titled “Using AI to Enhance Creativity.” This series will break down a creative process that leverages AI. It does not replace the thinking of the user. This process has effectively supported the development of various projects. These projects are [...]

TAPE Graphic

for Responsible AI-Use in Classroom The original TAPE graphic that started it all— download it and hang it up in your classroom, embed it into a presentation, or post it on your LMS to quickly share how your students can be responsible users of AI. Attribution Alex would be thrilled if you would like to [...]

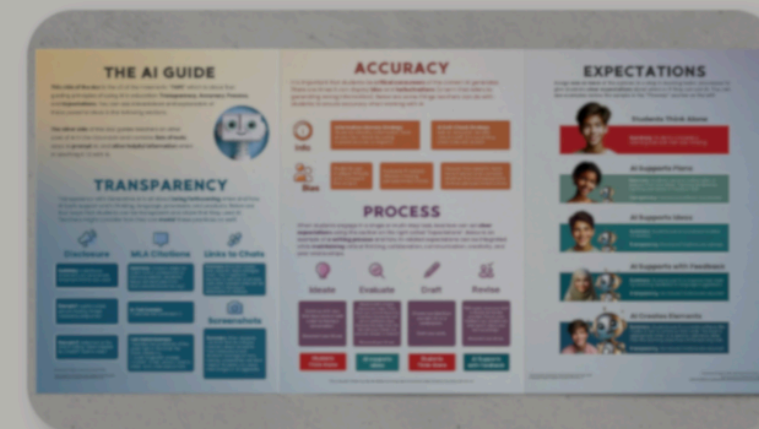

2

Creativity and AI Presentation

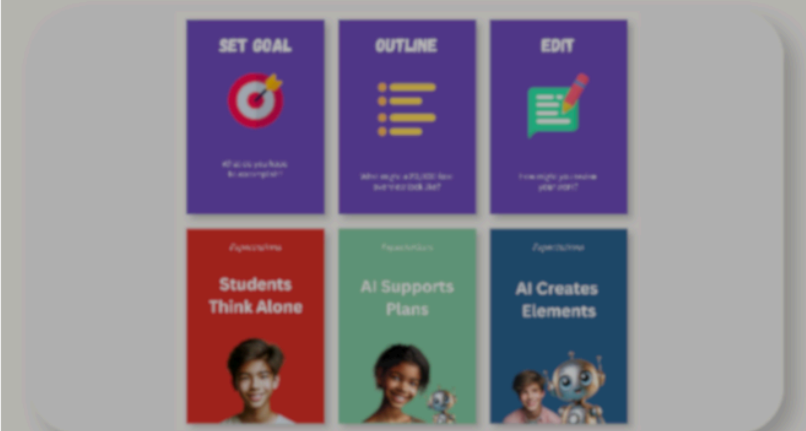

Presentation about ways you can incorporate AI into the writing process with your students and set clear expectations. This presentation includes several writing journal templates and examples of ways you can set expectations with links to chatbots to experience writing from a student’s perspective!

The AI Guide

Responsible-Use Framework and Practical Tips for Educators Teaching in the age of AI can feel like navigating uncharted territory. That’s why I’m thrilled to share a fantastic resource I collaborated on with the amazing Holly Clark: The AI Guide! This free, six-page document is packed with practical tips. It also includes ethical frameworks to help K-12 [...]

Writing with AI Cards

Brainstorm a Writing Process & Expectations about When & How AI Can Be Used Introduction To The Cards Welcome to the Writing Process and AI Integration Cards! This innovative tool helps you develop your writing strategy and make informed decisions about AI use in your assignments. These cards offer flexibility and can be adapted to [...]

Guiding Question

How can we use AI to
enhance our **creativity**?

Note

This presentation is not advocating for particular tools; it's advocating for a **process, intentionality,** and the **human spark.**

Learning Target

Internalize a process that
can deepen thinking
when using AI

5 Key Concepts, Definitions

Concept 1:

AI is a “Cognitive Amplifier”

GenAI can help you transform your creativity, not replace it!
AI Disclosure: video and GIF by Sora

Concept 2:

The best results come from ongoing conversations with an AI

Keep the conversation going to make your ideas come to life.

AI Disclosure: image by Dalle 3, video by Pika

Concept 3:

High-Quality Input

When you put in high-quality ingredients, you will have better results.

AI Disclosure: image by Flux, video by Pika

Concept 4:

Avoid “Creative Convergence”

Put your own spin on the input and output whenever possible to avoid “creative convergence” and everyone getting similar content.

AI Disclosure: image by recraft.ai, video and GIF by Sora

Concept 5:

Credit Where Credit Due

Be open and honest about when and how AI informed or transformed your work. It can be as easy as a disclosure, or as formal as a citation.

AI Disclosure: video and GIF by Sora

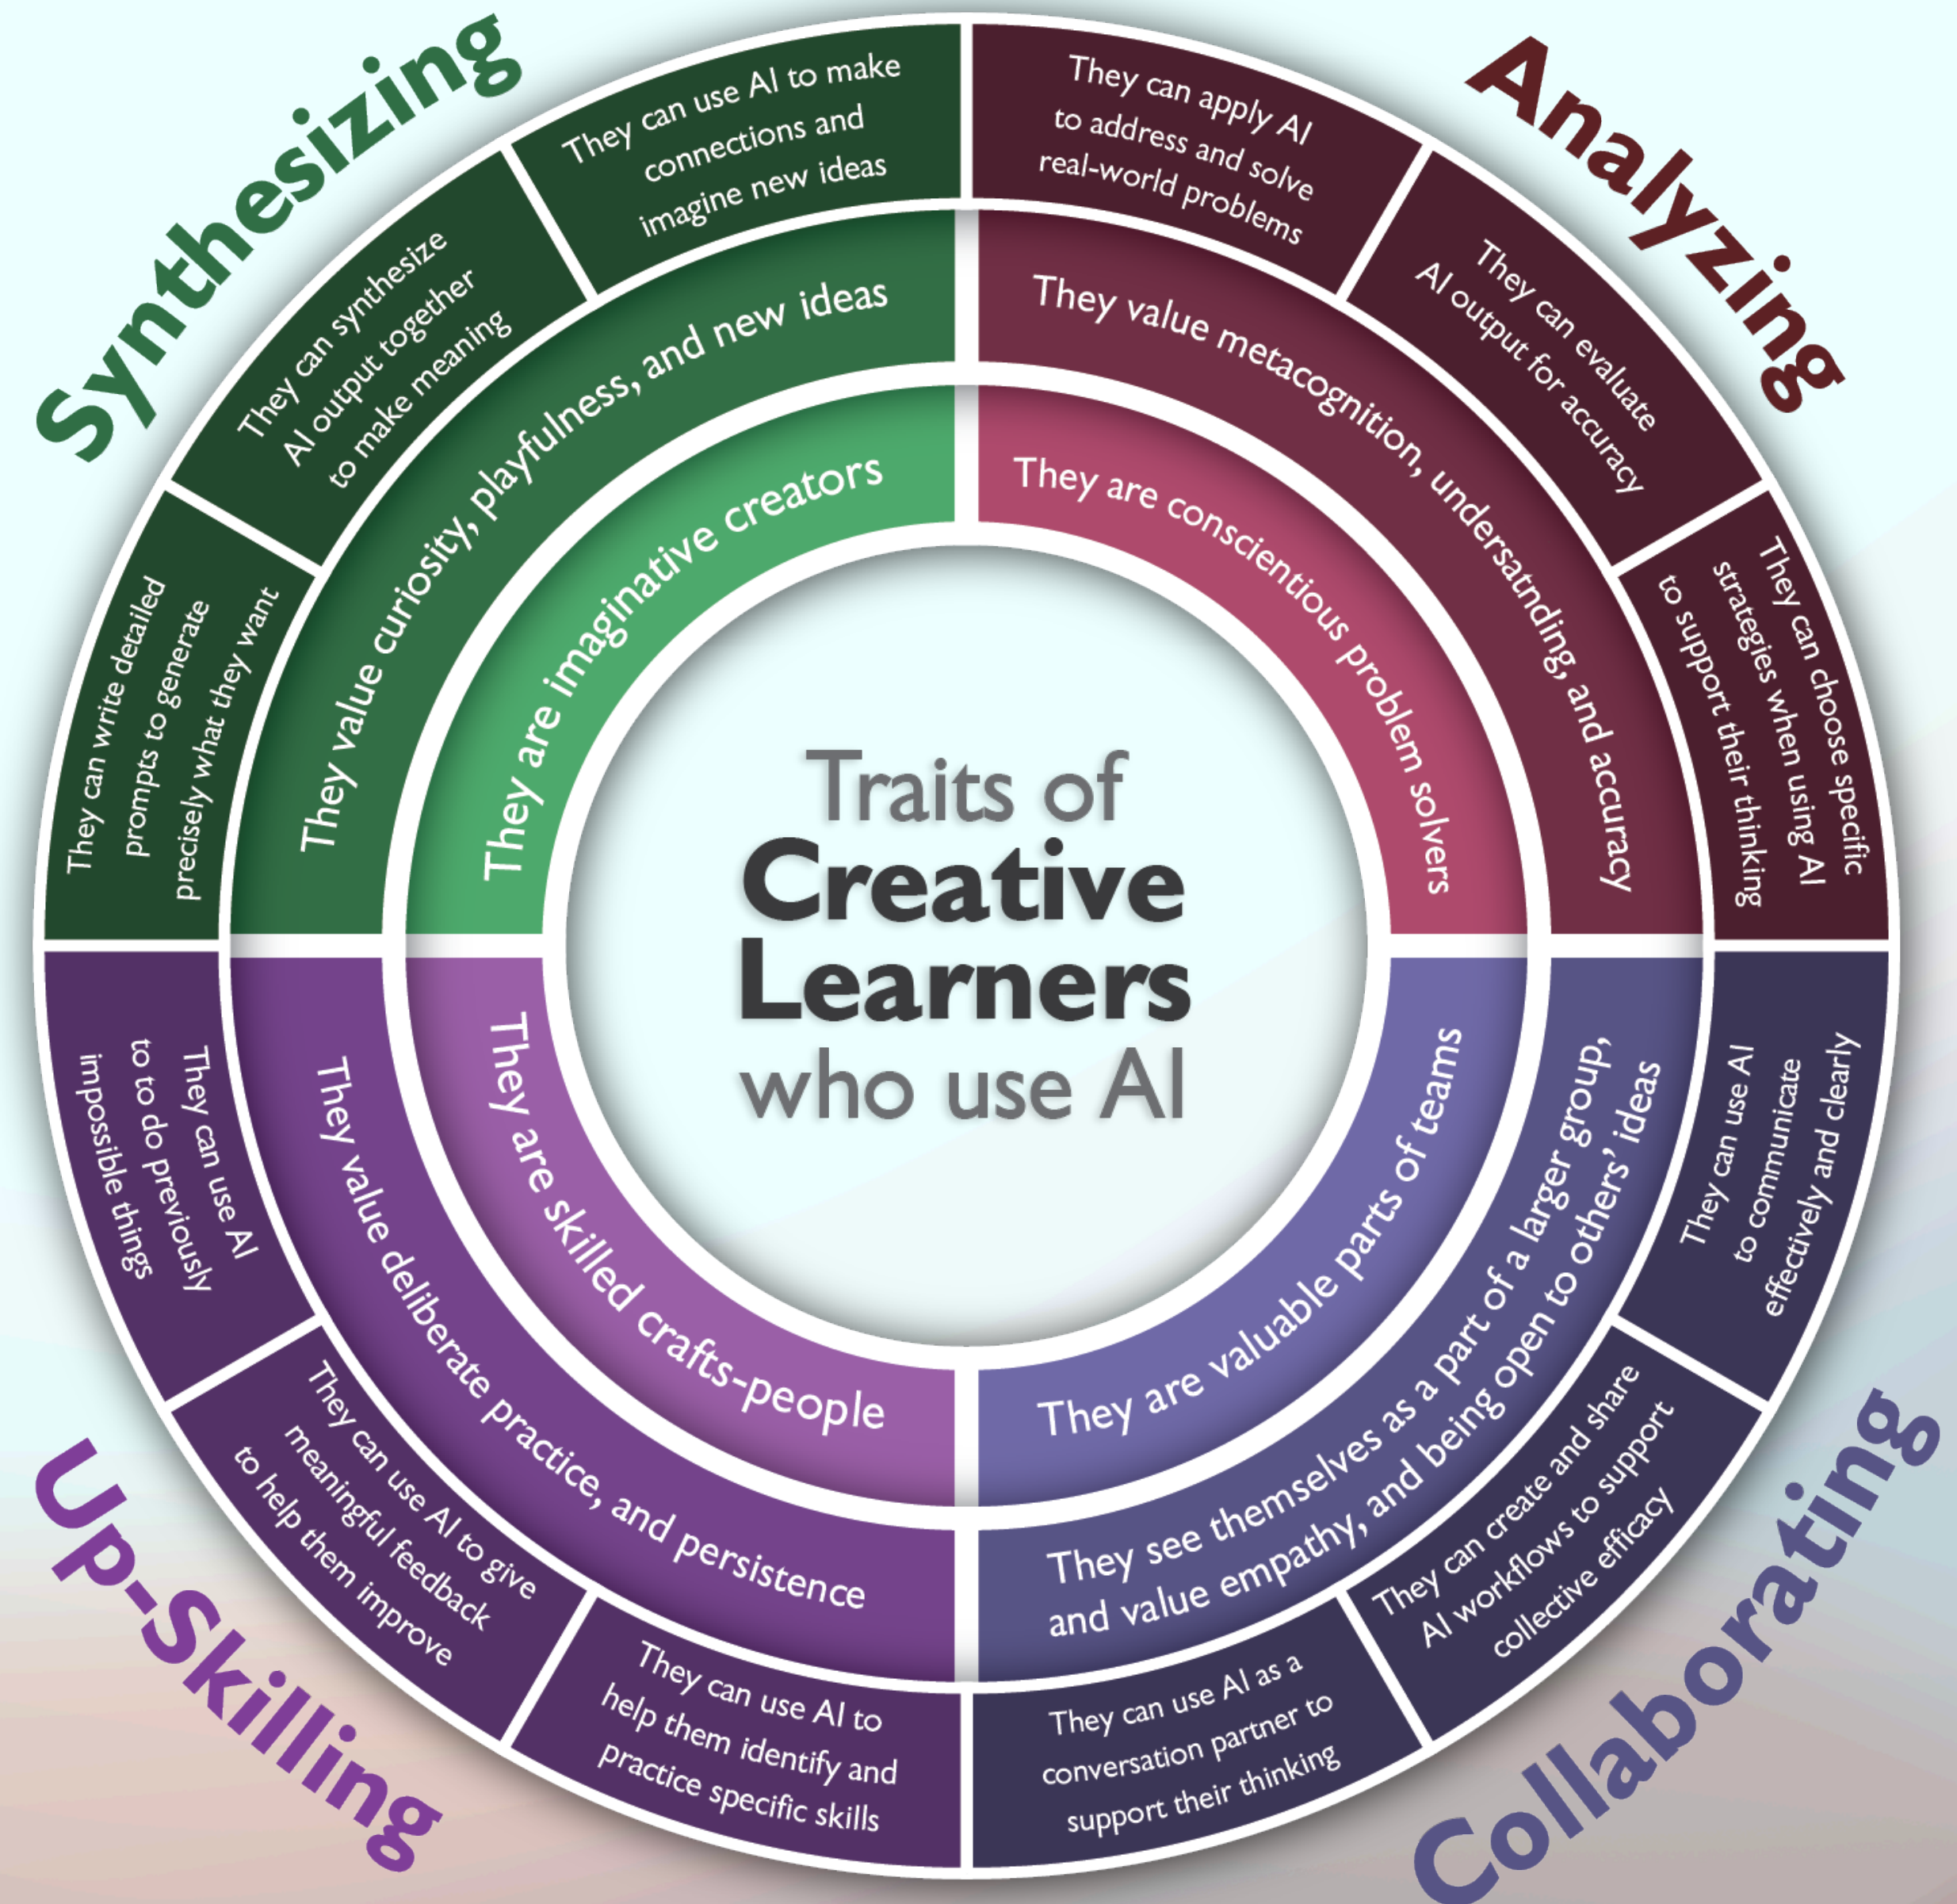

Key to The Graphic

This graphic illustrates **the multifaceted nature of creativity**—beyond originality—and demonstrates how AI can be used to enhance different dimensions of creative thinking. Rather than providing an exhaustive catalog of creative approaches or AI applications, it offers an outline for understanding how AI tools can complement and amplify human creative capabilities when used intentionally.

The inner ring represents our identities as creative humans, **the center ring** represents our values, and the **outer-most ring** represents examples of some skills and behaviors that learners might show when using AI for creative purposes.

This graphic intentionally does not include AI in learners' identities or values; our identities and values should drive our behaviors. In other words, when we consider who we are and what we value, we then decide how we use AI to enhance our creative thinking.

Critical & Creative Thinking

N SERIES

THE MIND
explained

The Mind, Explained

2019 | TV-14 | 2 seasons | Documentary

Ever wonder what's happening inside your head? From dreaming to anxiety disorders, discover how your brain works with this illuminating series.

Starring: Emma Stone, Julianne Moore

Critical & Creative Thinking

Process

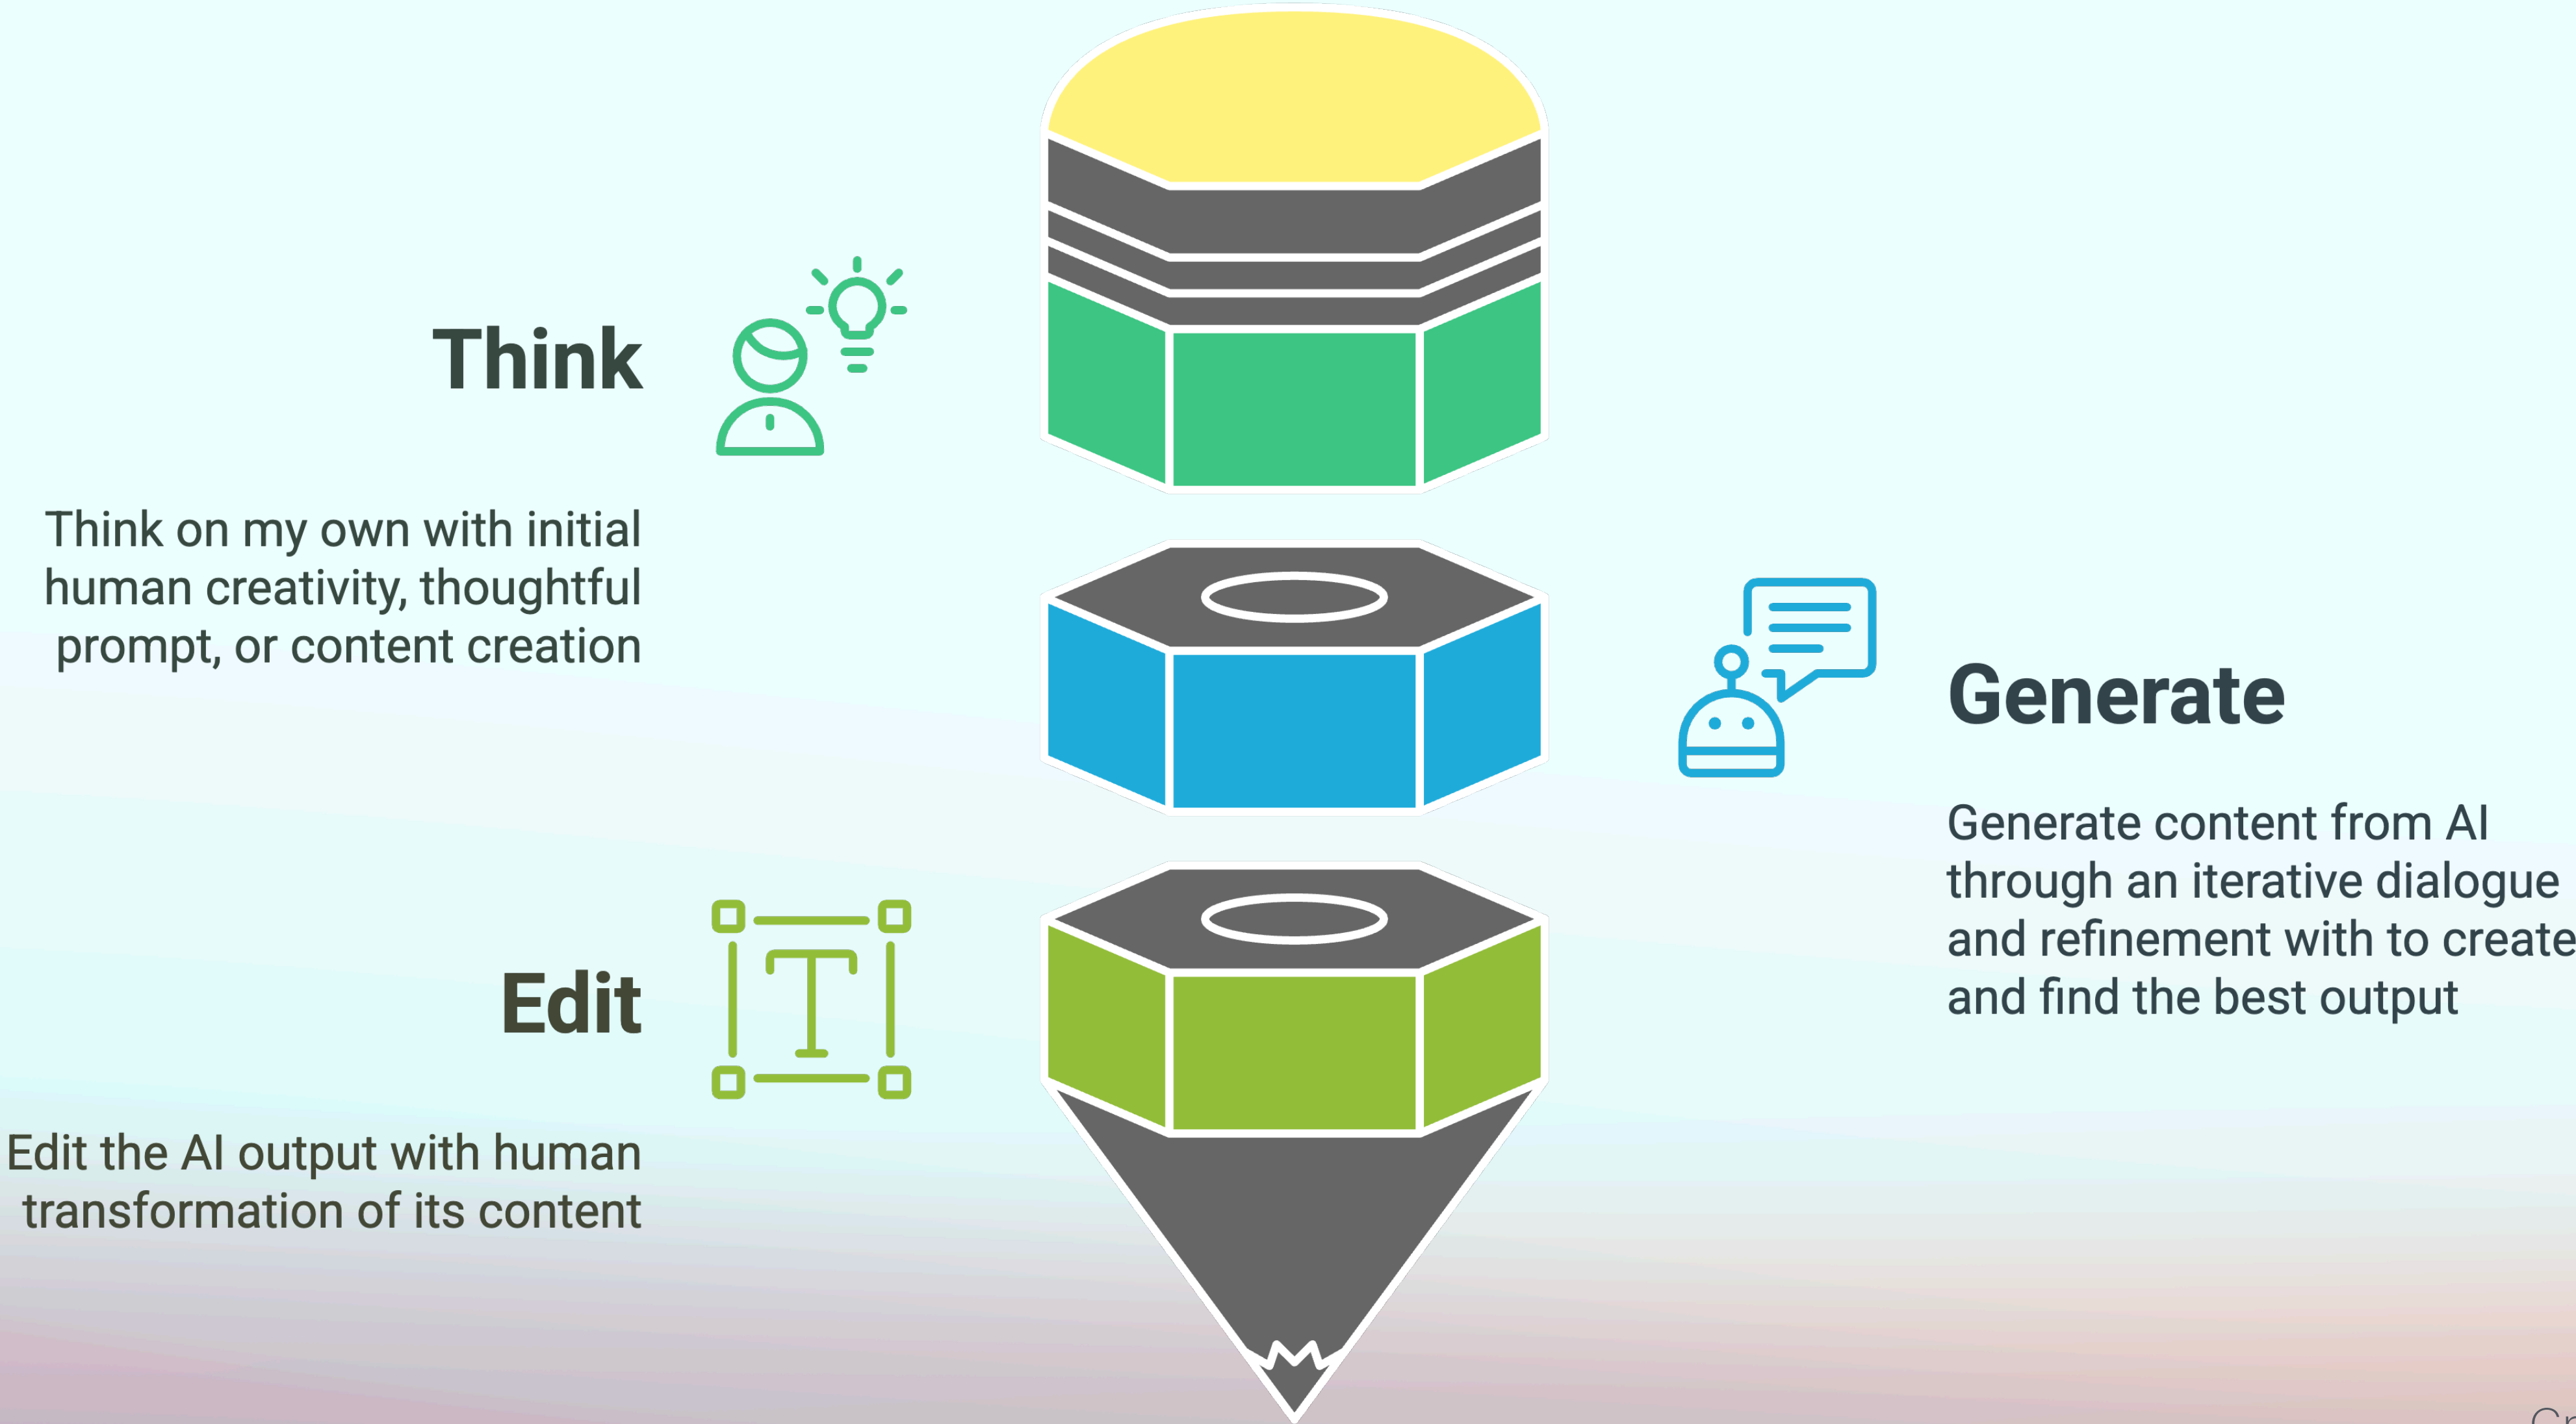

What's a Process?

Steps that scaffold thinking

- 1 Involves multiple **steps**
- 2 **Scaffolds variety** of thinking
- 3 Often **action** oriented
Plan, discuss, analyze, create, test
- 4 Makes thinking **visible**

*Examples: PZ Thinking Routines,
Design Cycle, Inquiry Cycle, Coaching Cycle*

Structure for Thinking Routines

1

Use the black card

2

THINK GENERATE EDIT

icons by napkin.ai

withTAPE.com

Discuss these questions to help spark your chat.

Is this process something **you**
can try on your own?

...or with your **students**?

If you were to **adapt** this thinking
routine to your context, what
things might you do?

Have you ever followed **a similar**
process when thinking creatively?

withTAPE.com

Worked Examples

Example 1: Music

Think: Write song
entirely on my own

Generate: 3 hours

Edit: Used my skills

Music by Alex McMillan + Suno

Image by recraft.ai

Example 2: Cards

Think: Conceptualized,
Canva project

Generate: prompts
and images of kids

Edit: flaticon and layout

Process Cards

AI-generated questions on
the front and back of each card

Expectation Cards

AI-generated children to show
how much AI can be used

Example 3: Podcast

Think: Interview

Generate: 11 Labs'
Voice Clone

Edit: Edited together

Example 4: Character

Think: Technical prompt
for Midjourney

Generate: Image generation

Edit: Pika for 360 video

The first image generated by a text prompt

Using the father on the right, I generated a video to show multiple angles to help imagine the character in different frames for a comic.

YOUR INTEREST

icon by napkin.ai

withTAPE.com

Discuss these questions to help spark your chat.

What **personal interests** did you
see a connection to?

Next time you're working on a
project, **what could you try?**

How could you make sure you're
always keeping **a human in the
loop** when it comes to creation?

withTAPE.com

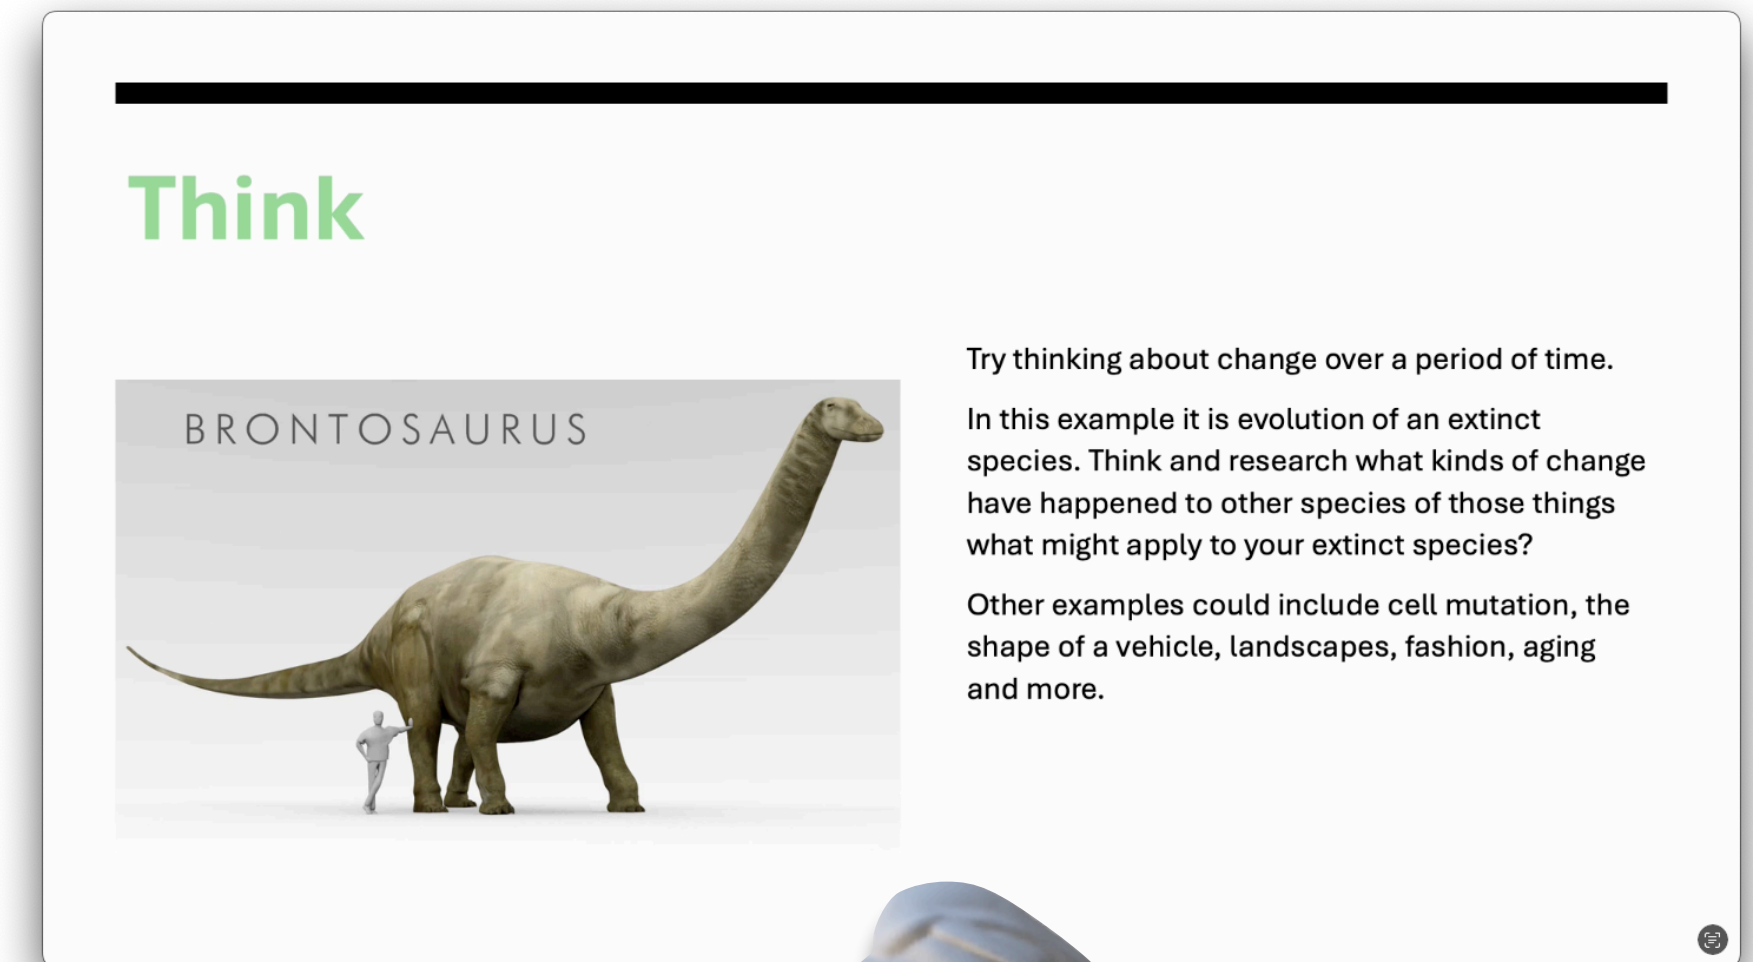

1:00

Example 6: 3D Models

Think: Students thought about evolutionary change, then crafted prompts

Generate: input prompts into an AI

Edit: Modified then printed 3D model

Example 9: Magazines

Think: Students learned about tone, made plans

Generate: Generated visuals in Canva

Edit: Students added designs, regenerated parts

Example 9: Exemplar Inspiration

Think: Planned, drew

Generate: Generated options, new scenarios

Edit: used as storyboard art and drew own pieces

Original based on a drawing

Example 9: Languages

Think: OCR-extracted text,
Magic School comprehension,
Eleven Labs voices

Generate: Prompting, refining

Edit: Garage Band

ACADEMIC SUBJECTS

icons by napkin.ai

withTAPE.com

Discuss these questions to help spark your chat.

Next time you're in class with students, **what could you share with them** from today's presentation?

How do you think your academic subject could **benefit** from AI?

What things do you want **to watch out for** when students are being creative with AI?
